

IUTOX Joins the Scientific Liaison Coalition (SLC)

IUTOX recently joined the Scientific Liaison Coalition (SLC). The mission of the SLC is to strengthen partnerships between domestic and international scientific organizations with the goal of advancing science to improve human and environmental health. Currently, twelve organizations, including IUTOX, actively participate in the SLC representing various disciplines within toxicology, safety, and risk assessment. The SLC actualizes its mission as a nimble coalition of scientific, biomedical, and health-based societies working collaboratively on cutting-edge webinars, conferences, and sessions/continuing education courses at scientific meetings. For more information, please visit:
